

I would like to see Indiana telephone privacy law stay the way it is right now. It has decreased the amount of calls from telemarketers considerably. We use to get quite a few all week long, even on the weekends. Since our phone number was placed on the list, we haven't received but a few with in a couple months time. I think it is important to limit the nuisance calls people get. It is extremely aggravating to be busy and stop to answer the phone and the person on the other end is a telemarketer. Thank you for listening. Please do not change the law.
